Description

Cattle Prod, Upgraded Waterproof Cattle Prod Stick for Cattle, Pigs, Sheep - Electric Livestock Herding Tool with Stable Safe Voltage, Stormproof Design and Long-Lasting Battery 39in Blue 82

Title: Cattle Prod, Upgraded Waterproof Cattle Prod Stick for Cattle, Pigs, Sheep - Electric Livestock Herding Tool with Stable Safe Voltage, Stormproof Design and Long-Lasting Battery 39in Blue Condition: New \$82 Dual-Switch Safety Protection Features dual-switch safety design: the power switch and stun switch operate independently. Discharge only occurs when the power switch is ON and the stun switch is pressed. This prevents accidental shocks, ensuring safe handling for farmers and handlers using this livestock prod. Advanced Safety Technology Equipped with an advanced control chip, this livestock prod maintains stable 10,000V output even at low battery levels. The prod features a low-current mode (0.3mA) for effective and safe herding, approved by veterinarians. This stun baton offers reliable performance with a design that prevents accidental discharge, making it safer than traditional stun guns. Ultra-Long Performance Equipped with a 5000mAh rechargeable battery, this hot shot cattle prod offers up to 2000 uses per charge with just 5 hours of charging time. Ultra-low self-discharge design keeps your stun gun ready for months, even when stored. Compatible with USB-C, car chargers, and wall plugs for ultimate convenience in field

operations. 4-Size Versatility Choose from four lengths (23"/58cm, 28"/70cm, 35"/88cm, 43"/108cm) to suit cattle pens, pig sties, or dog kennels. This Cattle Prod is designed without LED lighting to avoid startling animals, focusing purely on efficient herding with a stun baton that works day or night. Unbreakable Durability Crafted with durable PVC material for flexibility and strength bends easily without breaking. Sealed charging and connection ports with waterproof gaskets ensure IP45 water resistance, making this Cattle Prod ideal for harsh farm environments. The livestock prod design withstands daily use while protecting against rain and dust. Usage Precautions Note: Do not use this Cattle Prod while it is fully submerged in water, as it may damage the power supply system. Although the product can be fully immersed in water, it is designed for use outside of water. Additionally, please ensure the insulating rubber on the charging port remains intact. Only expose it during charging and keep it covered at all other times to maintain waterproof integrity and prolong the life of your livestock prod.
