VEVOR Single Post Handrail for Outdoor 1-3 Steps, 40.5"L x 35.4"H, Dia 1.3" Metal Bent Stair Handrails, Floor Mounted Carbon Steel Stair Railing, U-Shaped Post Grab Rails with 2 Anti-Skid Crossbar 56

Brand: VEVOR Model: HR-09 Title: VEVOR Single Post Handrail for Outdoor 1-3 Steps, 40.5"L x 35.4"H, Dia 1.3" Metal Bent Stair Handrails, Floor Mounted Carbon Steel Stair Railing, U-Shaped Post Grab Rails with 2 Anti-Skid Crossbar Condition: Like New \$56

High-Quality Material: We understand the importance of safety in areas like stairs, hallways, or balconies for you and your family. Therefore, we ensure our handrails are made from high-hardness carbon steel, with fine welding for stability to prevent any potential accidents. The sandblasted surface is smooth, offering a more comfortable grip.

250 lbs Strong Load-Bearing: The wall-mounted handrail is durable and provides continuous safety protection for the elderly and children. Its burr-free surface is peel-resistant and can withstand sun, rain, and snow. The thickened handrail offers a comfortable grip, ensuring secure use for pregnant women and the elderly.

Suitable for 1-3 Steps: This 40.5" wall-mounted handrail is perfect for 1-3 steps, with a left handle length of 9.5", a right handle horizontal length of 8.5", and a slant length of 22.1". It is ideal for most garages, gardens, hallways, and more.

Metal Expansion Tubes: To enhance the handrail's sturdiness, we use high-quality metal expansion tubes.

Unlike plastic, they provide double reinforcement when paired with metal screws, fully supporting the weight of adults without wobbling or deforming, ensuring a longer service life. Wide Applications: The outdoor wall-mounted handrail can be installed on concrete, wood, tiles, marble, and other sturdy materials. Even when installed outdoors, it is resistant to rust, highly practical, and versatile for any location that needs installation.
