Description

Cordless Cellular Shades, Light Filtering Honeycomb Blinds, Polyester Pleated Cellular Blinds for Windows, Home, Bedroom, Office, 23" W X 64" H, White 47

Brand: Bliwans Model: HB-80-058163-W Title: Cordless Cellular Shades, Light Filtering Honeycomb Blinds, Polyester Pleated Cellular Blinds for Windows, Home, Bedroom, Office, 23" W X 64" H, White Condition: Like New \$47 Safety Cordless Design Cordless cellular shades is safer for children and pets. Cord-free design provides a clean, tangle-free look to the window blinds and creates a safer environment for children and pets. The lift system allows the shades to stop at any height. To control the light in your room, simply lift up or pull down from the bottom, it will stay at where you stopped. 100% Blackout & Room Darkening Opaque lining provides the ultimate in room-darkening and 100% blackout. Special blackout liner is attached on the inside of the blackout blinds material, making our window shades block 100% light and harmful UV rays. Perfect cordless window blinds for bedroom, home, office, nursery, or media rooms. Honeycomb Structure Cellular shades, also known as honeycomb shades, are made up of different compartments. Honeycomb blinds were inspired by bees and the honeycomb structure acts as insulation to keep your room warmer in winter and cooler in summer. Honeycomb design and the built-in aluminum foil reflects UV rays and heat in the summer and keeps out cold air in the winter. Heat & Sound Absorption

Honeycomb design and the built-in aluminum foil reflects UV rays and heat in the summer and keeps out cold air in the winter. Blackout cellular shades absorb sound energy, creating a more quiet, tranquil room, just pull down the shades to darken the room, very suitable for nap and bedtime. Due to the special honeycomb structure, the shades offer noise reduction effects that can make your environment quieter and protect your privacy of conversations. Easy to Install & Clean The cellular shades can be mounted inside or outside. The honeycomb structure is easy to clean, use a small cloth, a feather duster or a hand vacuum cleaner with a soft brush. All blinds have a little deduction. Inside Mounting cell blind black out for windows require a minimum 2" window frame depth, blackout shades width need to be 1/4" less than window width. Please note that the fabric width will be approximately 0.3 inches shorter than the top rail. Energy Efficiency Stylish and affordable honeycomb shades. Energy efficient cellular construction helps maintain indoor room temperatures. The unique honeycomb structure allows air to be stored in the hollow layer, provide ideal insulation for energy efficiency saving you money all year on your energy bills.
