Description

VEVOR Metal Access Panel for Drywall Ceiling, 16 x 16 Inch Plumbing Access Doors with Cam Latch Lock, Heavy-Duty Steel Wall Hole Cover, Easy Install Removable Hinged Panel for Wiring & Cables, Silver 29

Brand: VEVOR Title: VEVOR Metal Access Panel for Drywall Ceiling, 16 x 16 Inch Plumbing Access Doors with Cam Latch Lock, Heavy-Duty Steel Wall Hole Cover, Easy Install Removable Hinged Panel for Wiring & Cables, Silver Condition: Like New \$29
Durable Material: This access panel is made of rust-resistant galvanized steel, which is moisture-proof, wear-resistant, and rust-free. It is also extremely sturdy, ensuring that your interior access doors will not rust or deteriorate. Structural Design: The easy install panel features a stainless steel cam latch lock, which operates smoothly and is complemented by a large screwdriver slot. With a simple twist, the door can be easily opened. Inside the access panel, a machine door lock is installed to prevent accidental pushing or opening of the door during daily use. Stainless Steel Pin Hinges: The stainless steel material used for the wiring access panel ensures a secure connection, preventing deformation or detachment even after repeated opening and closing. The pin hinges allow the door to open up to 165 degrees, helping you expand the accessible working area. Strong Adaptability: The surface of the plumbing reinforced access door can be painted. Both the interior and exterior of the metal access door are

primed with white baked paint, allowing for personalized decoration according to different usage environments. The recess ensures a flush alignment with gypsum board or ceiling, making it suitable for both ceilings and walls. Versatile Applications: The 16x16-inch size is suitable for mounting on walls or ceilings in homes and can be used in various settings such as offices, shops, factories, and hotels.
